

Sign-up flow.

Three screens covering account creation: email/password form → email verification → success. Every element is numbered with a matching spec callout describing its type, copy, validation, and behaviour.

- 01 · Sign-up form
- 02 · Verify email
- 03 · Account created
-

Sign-up form (email + password)

|| already have an account? sign in

SPEC CALLOUTS

01. Sign-up form

public route · desktop + mobile

- 1** **IMAGE** **Logo**
SVG mark. Links to "/" (marketing home).
 - 2** **CARD** **Sign-up card**
Max-width 460px, centred. Drop shadow. Page bg = paper.
 - 3** **TEXT** **Heading (H1)**
Copy: "Get on the station." Display font, bold. Accent word "station." in orange.
 - 4** **INPUT** **Email field**
`type="email" · required · autocomplete="email" · validation: RFC-5322 regex · inline error on blur if invalid.`
 - 5** **INPUT** **Password field**
`type="password" with show/hide toggle · required · min 8 chars · live strength meter (weak / fair / strong / excellent).`
 - 6** **INPUT** **Confirm password**
`type="password" · required · must match field 5 · inline error on blur if mismatch.`
 - 7** **CHECK** **Terms checkbox**
Required. Links open in new tab to /terms and /privacy. Submit disabled until checked.
 - 8** **BUTTON** **Primary CTA**
Label: "Create account". Disabled while invalid. Loading state: spinner + "Creating...". On success → /verify-email (Screen 02).
 - 9** **DIVIDER** **OR divider**
Visual only. Dashed lines + "or" label.

Verify email

check your inbox.

we sent a verification link to
priya@yourkitchen.co.uk
click the link to activate your account.

 [Resend email](#)

wrong address? edit email
can wait 30s before resending

9 d help? contact support

SPEC CALLOUTS

02. Verify email

email-based flow only · skipped for google sign-up

- | | | |
|---|--------|---|
| 1 | IMAGE | Logo
Same as Screen 01. Persistent on every auth screen. |
| 2 | IMAGE | Envelope icon
Decorative SVG. Could animate the orange tick on first mount. |
| 3 | BADGE | Step indicator
Copy: "Step 2 of 3". Reassures the user where they are. |
| 4 | TEXT | Heading (Hi)
Copy: "Check your inbox" Display font, bold. |
| 5 | TEXT | Body copy
Pattern: "we sent a link to {email}". Email pulled from the signup form and rendered bold. |
| 6 | BUTTON | Resend CTA
Secondary style. POST /auth/resend-verification. States: idle → "Sending..." → "Email sent ✓" (3s) → idle. Disabled 30s after click. |
| 7 | LINK | Edit email link
Returns to Screen 01 with the email pre-filled so the user can fix typos. |
| 8 | TEXT | Helper text
Microcopy explaining cooldown + 24h nudge expectation. |
| 9 | LINK | Support link
Footer. Opens mail client or /support page. |

Notes for engineering

Account created

STEP 3 OF 3 . ALL DONE

you're on the station.

next: tell us what kind of operation you run.

Continue setup →

or skip to dashboard

8 Confirmation email is on its way. ✦

SPEC CALLOUTS

03. Account created

success state · routes onward to domain picker

 Logo
 Same lockup.

2. **IMAGE** **Success illustration**
Animated checkmark + radiating rays on mount.
Pure SVG, no Lottie.

3 **BADGE** Step indicator
Copy: "Step 3 of 3 · all done". Closes the loop.

4. **TEXT** **Heading (H1)**
Copy: "You're on the station." Display Font, bold
Carries the brand metaphor.

- 5 **TEXT** **Body copy**
Confirms the email used. Primes the user for the next step (domain picker).

- 6. **Button** **Primary CTA**
Label: "Continue setup". Routes to /onboarding/domain (multi-domain picker). Most users should take this path.

7 **LINK** Skip link
Routes to /dashboard with no domain selected.
Domain picker shows as a banner on the dashboard until completed.

8	TEXT	Footer message Confirms a welcome email is being sent (separate from verification email).
---	------	--

Notes for engineering

Server actions on land: mark email_verified_at = now(), set session cookie, enqueue welcome_email job.
